Available Drugs for Prescribing under Schedule 3 of the Manitoba Pharmaceutical Regulations

** Schedule 3 lists the prescription drug categories that a member may prescribe once authorized. The following list contains the available drugs (but not necessarily commercially available drug products) under these prescription categories.*

Atopic Dermatitis, Allergic and Irritant Contact Dermatitis, Urticaria

D07AA: Corticosteroids, weak (group I), dermatological preparations

- Methylprednisolone
- Hydrocortisone
- Prednisolone

N.B. Combinations of corticosteroids are NOT included for weak corticosteroid dermatological preparations.

D07AB: Corticosteroids, moderately potent (group II), dermatological preparations

- Clobetasone
- Flumethasone
- Fluorometholone
- Desonide
- Triamcinolone
- Dexamethasone
- Combinations of corticosteroids

N.B. Combinations of corticosteroids are included for moderately potent corticosteroid dermatological preparations.

Acne Vulgaris

D10AE01: Benzoyl peroxide

D10AF01: Clindamycin

D10AF51: Clindamycin combinations

N.B. Combination products containing benzoyl peroxide and clindamycin are included in the above category. Other clindamycin combination products cannot be prescribed by a pharmacist.

Tinea Pedis

D01AE: Other antifungals for topical use

- Salicylic acid
- Ciclopirox
- Terbinafine
- Tolnaftate
- Combinations

N.B. Combinations of other antifungals for topical use are included in the above category.

Available Drugs for Prescribing under Schedule 3 of the Manitoba Pharmaceutical Regulations

Candidal Stomatitis

A07AA02: Nystatin

- Nystatin Oral

N.B. Combination nystatin products are not included in this category.

Unspecified Haemorrhoids without Complication

C05AA: Corticosteroids for treatment of hemorrhoids and anal fissures for topical use

- Hydrocortisone
- Prednisolone
- Betamethasone
- Fluorometholone
- Dexamethasone
- Fluocinolone acetonide
- Fluocinonide
- Triamcinolone

N.B. All antihemorrhoidal products, which contain corticosteroids, are classified in this group, including both plain products and combinations with anti-infectives, local anaesthetics etc. Combinations may occur.

Vasomotor and Allergic Rhinitis

R01AD: Corticosteroid nasal preparations for topical use

- Beclomethasone Nasal
- Flunisolide Nasal
- Budesonide Nasal
- Fluticasone Nasal
- Mometasone Nasal
- Triamcinolone Nasal
- Fluticasone furoate Nasal
- Ciclesonide Nasal
- Fluticasone, combinations

N.B. Combinations of corticosteroid nasal preparations for topical use are only included for prednisolone, dexamethasone, fluticasone, and hydrocortisone.

R01AX03: Ipratropium Bromide Nasal

Seborrhoeic Dermatitis (Excluding Pediatric)

D01AE: Other antifungals for topical use

- Salicylic acid
- Ciclopirox
- Terbinafine
- Tolnaftate
- Combinations

N.B. Combined preparations are classified in this group if mycosis is the main indication. As well, combined preparations containing salicylic acid, which are used as antifungals (e.g. dusting powders), are included.

Available Drugs for Prescribing under Schedule 3 of the Manitoba Pharmaceutical Regulations

Recurrent Oral Aphthae

A01AC: Corticosteroids for local oral treatment (stomatological preparations)

- Triamcinolone
- Dexamethasone
- Hydrocortisone
- Prednisolone, combinations

N.B. Combinations of corticosteroids and local anesthetics are classified here for local oral treatment.

Vomiting of Pregnancy, Unspecified

R06AA59: Doxylamine, Combinations

N.B. Combination products with doxylamine are included in the above category.

Smoking Cessation

N07BA: Drugs used in nicotine dependence

- Nicotine Sublingual/buccal
- Nicotine Chewing gum
- Nicotine Inhalation
- Nicotine Transdermal
- Varenicline

N.B. Bupropion is not included in this category.
