--	--

Please complete the assessment by circling the most accurate response based on the following rating scale:

1	We are confident in our compliance
2	We are not sure if we are compliant
3	We need help to be compliant
N/A	Not applicable at this pharmacy

Part 1:

Risk Assessment

1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	For each compounded product, a risk assessment has been undertaken to identify appropriate level of requirements to minimize contamination and to provide adequate protection for personnel.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The cumulative risk associated with all preparations compounded in the pharmacy has been assessed.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Documentation specifies potential risks of compounding the product and extra steps that must be taken to mitigate the risk.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	If a small quantity of a hazardous product is used in compounding, there is documentation of alternative containment strategies and/or work practices employed to minimize occupational exposure.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	For each compound, safety data sheets and other applicable references are consulted.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	For each compound, appropriate procedures for safe compounding are documented on the Master Formulation Record.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	For each compound, additional laws and regulations governing the compounding of hazardous preparations and the handling of hazardous products are consulted.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The risk assessment is reviewed at least every 12 months to ensure that it is still valid.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	If several different high-risk or low-risk preparations are being compounded, the cumulative risk is considered, even if they are compounded on different days.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Consideration of cumulative risk is documented in the risk assessment.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	WHIMIS safety data sheets are available to all employees.

<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Compounding Personnel

<p>1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>A non-sterile compounding supervisor has been assigned.</p>
<p>1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Assignment of tasks by the non-sterile compounding supervisor is a formal delegation process or under supervision in accordance with the regulations.</p>
<p>1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>The non-sterile compounding supervisor ensures the following requirements are met:</p> <ul style="list-style-type: none"> <input type="checkbox"/> Measures are in place (i.e., personnel training and assessment program) to ensure that personnel are competent to perform compounding, which includes training for any specific populations (e.g., pediatric, geriatric, veterinary). <input type="checkbox"/> Personnel know and fully comply with policies and procedures. <input type="checkbox"/> The existing compounding process yields high-quality non-sterile preparations. <input type="checkbox"/> A risk assessment is performed to determine appropriate requirements for each compounded preparation. <input type="checkbox"/> Appropriate measures are taken to ensure the safety of personnel during each preparation. <input type="checkbox"/> Procedures for incident/accident reporting and follow-up, as well as recall procedures, are in place. <input type="checkbox"/> Policies and procedures covering all activities are developed, regularly reviewed and updated. <input type="checkbox"/> The facilities and equipment used to compound non-sterile preparations meet requirements and are maintained, calibrated or certified according to manufacturers' specifications or standards, whichever are more stringent. <input type="checkbox"/> The available, recognized scientific literature is used to determine stability and to establish the BUD for each non-sterile preparation. <input type="checkbox"/> Master Formulation Records are developed, reviewed and updated. <input type="checkbox"/> An ongoing quality assurance program, designed to ensure that preparation activities are performed in accordance with standards of

	<p>practice, scientific standards, existing data and relevant information, is implemented, followed, evaluated and updated as required.</p> <p><input type="checkbox"/> Current editions of mandatory and supplementary references, which should be in compliance with provincial/territorial requirements, are available. Safety data sheets are available and updated regularly, or are readily accessible in an electronic format.</p> <p><input type="checkbox"/> All records of decisions, activities or specifications required by the Model Standards are completed, and any changes are documented and traceable. The records are retained and readily available for audit and inspection purposes, as required by the provincial/territorial pharmacy regulatory authority.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Non-regulated pharmacy personnel are supervised by a pharmacist or pharmacy technician according to established supervision protocols and appropriate quality measures.</p>
<p>Conduct of Personnel in compounding areas</p>	
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Personnel behave in a professional manner and follow all pertinent policies and procedures.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Personnel follow the procedures on the Master Formulation Record.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Appropriate hand hygiene is performed, before and after compounding.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Powder free gloves are donned after proper hand hygiene</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>A clean lab coat reserved for compounding or a disposable gown is worn.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>If a clean laboratory coat is worn, it is reserved for making non-sterile preparations and not worn outside the compounding area.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>When employees leave the compounding area, lab coats are left behind.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Used laboratory coats are put on again when the employees return to the compounding area, only when the coats are clean and unsoiled.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Laboratory coats are changed as soon as they become soiled or according to established protocols.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Disposable gowns are changed every day or as soon as they become soiled.</p>

<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Other sources that might contaminate the preparation are avoided, such as:</p> <p><input type="checkbox"/> loose hair</p> <p><input type="checkbox"/> long or false nails</p> <p><input type="checkbox"/> jewellery on hands and wrists</p> <p><input type="checkbox"/> chewing gum</p> <p><input type="checkbox"/> consuming food or drink</p> <p><input type="checkbox"/> using tobacco in the compounding area</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>The compounding supervisor is notified if the compounder has an active respiratory tract infection, an eye or skin infection, a hand lesion or other ailment.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>If indicated on the Master Formulation Record, a cap and mask, eye protection and, a beard guard is worn.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Any other reasonable measures are taken to prevent cross-contamination and to ensure protection from chemical exposure.</p>
	<p>Food or drink is not stored or consumed in the compounding area.</p>

Training and Skills Assessment

<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>All personnel involved in compounding possess expertise commensurate with their responsibilities.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Before compounding personnel undertake non-sterile compounding, they have received the proper orientation, training and a skills assessment concerning their work and the type of compounding to be done.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>A skills assessment program, which considers the type and complexity of operations performed, is established for all personnel involved in non-sterile compounding.</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Compliance with operating procedures and application of non-sterile compounding techniques are evaluated regularly and are included in the skills assessment program for compounding personnel.</p>
	<p>Cleaning personnel</p>
<p>1 2 3 N/A</p> <p><input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/></p>	<p>Cleaning personnel know all policies and procedures related to:</p> <p><input type="checkbox"/> cleaning and decontaminating the equipment</p> <p><input type="checkbox"/> cleaning and decontaminating furniture and facilities</p>

	<input type="checkbox"/> policies and procedures related to hygiene <input type="checkbox"/> policies and procedures related to personal protective equipment <input type="checkbox"/> cleaning and disinfecting tasks.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Cleaning personnel know and use personal protective equipment specifically for handling hazardous products.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Cleaning personnel know and use the emergency measures to be applied in case of accidental exposure, accidents or spills.

Policies and Procedures

1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Established policies and procedures provide detailed descriptions of all activities, including cleaning; regarding the pharmacy's compounding of non-sterile preparations
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The non-sterile supervisor ensures application of and compliance with these policies and procedures.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Established policies and procedures are promptly updated whenever there is a change in practice or in standards.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	At a minimum, policies and procedures are reviewed every 3 years to ensure currency..
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	For handling or compounding hazardous drugs or materials, additional policies and procedures have been developed; including the safe receipt, storage, handling, compounding, labelling, transport and disposal of hazardous drugs and materials
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	When compounding is undertaken by another pharmacy, the dispensing facility has included in its general procedures manual information about policies and procedures for acquiring compounded non-sterile preparations for patients (originating pharmacy, entry in the file, delivery, etc.).

Facilities and Equipment

1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	If a pharmacy or healthcare facility compounds any sterile preparations, the area of the pharmacy reserved for this purpose is separate and distinct from the area of the pharmacy set aside for nonsterile compounding.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	All compounding is performed in a separate space specifically designated for compounding of prescriptions.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The compounding space is located away from parts of the pharmacy where there is a considerable amount of traffic (aisles, entrance and exit doors, etc.)
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Compounding areas are large enough for compounding personnel to work comfortably and safely, with room to store equipment and products in an orderly manner, in clean and secure surroundings.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	All components, equipment, and containers are stored off the floor, in a manner that prevents contamination and allows for inspection and cleaning of the compounding and storage area.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The compounding area is conducive to necessary cleaning, containing no areas that are difficult to clean.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The areas used for non-sterile compounding is maintained in clean, orderly and sanitary conditions with appropriate and sanitary waste disposal, and is maintained in a good state of repair.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The lighting fixtures are located so as to provide a well-lit area facilitating the compounding process and allowing verification at all stages of compounding.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The heating, ventilation and air conditioning system is controlled in such a way as to avoid decomposition and contamination of chemicals, to maintain the quality and efficacy of stored products and to ensure the safety and comfort of compounding personnel
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Air vents are not located directly over work areas, to avoid contamination of the products.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	A clean water supply, with hot and cold running water, is available in or close to the compounding area or, for Level B and Level C requirements, in the compounding room.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Work surfaces and furniture are constructed of smooth, impervious and non-porous materials, preferably stainless steel.
1 2 3 N/A <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Any breakage is repaired and sealed at the earliest opportunity.

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	All furniture, as well as the floor and wall surfaces, have been designed and placed to facilitate cleaning and disinfecting.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A cleaning schedule appropriate to the level and type of non-sterile compounding has been established.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The worktop surface used for non-sterile compounding is cleaned before and after each compounding session.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The equipment, instruments and accessories chosen are appropriate for the type of preparations to be compounded, and are reserved for compounding activities.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Any surfaces of instruments and accessories that come into contact with preparations do not negatively affect the purity or quality of the preparation being compounded
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	To ensure precision and reliability, all equipment, instruments and accessories are routinely inspected and checked to ensure proper performance and if applicable, calibrated at appropriate intervals as recommended by the manufacturer, or at least once a year if there are no manufacture recommendations
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	All specialized equipment and instruments used for compounding are cleaned regularly, as recommended by the manufacturer.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Cleaning work recommended by the manufacturer is noted in the maintenance log.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Equipment, instruments and accessories used for several different preparations are completely and thoroughly cleaned after each compounding session to remove all traces of the previous product and any remaining water and solvent, thus preventing any cross-contamination between preparations
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A maintenance log is kept to record the dates of cleaning and/or calibration of specialized equipment and instruments; these entries include the name of the person carrying out the cleaning or calibration.

Level A Requirements

Level A refers to requirements to be met when compounding simple and moderate preparations, as defined in USP *General chapter <795>*, excluding mixing or reconstituting (in accordance with Health Canada’s policy on compounding). Requirements for Level A include a separate compounding area and the general requirements for procedures and equipment.

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Pharmacists have undertaken a risk assessment (see section 4 of the NAPRA Guidance document for Pharmacy compounding of non-sterile preparations) and identified the appropriate level of requirements needed to guarantee a high-quality product and adequate protection for personnel.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level A preparations could include simple or moderate preparations containing hazardous drugs in NIOSH Group 2 or 3,
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A non-sterile compounding supervisor has been appointed.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Compounding personnel have received orientation and training during education or on the job concerning the preparations to be compounded and underwent a skills assessment at the time of hiring; training has included learning and assimilating workplace operating procedures
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Compounding personnel participate in an annual skills assessment program.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level A preparations are compounded in a designated non-sterile compounding area

Phase 2:

Beyond Use Dating (BUD)

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Beyond Use Dating is determined by regulated pharmacy personnel with adequate experience and broad scientific knowledge.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Beyond Use Dating is assigned after consulting the manufacturer's documentation and literature on the stability, compatibility and degradation of ingredients.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Compounded products are monitored for signs of instability and/or degradation.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The manufacturer's expiry date for the drug is not used as the BUD for the final preparation.

Master Formulation Record

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The master formulation record has been developed for each non-sterile compound by regulated pharmacy personnel with adequate experience and broad scientific knowledge.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The master formulation record includes all necessary information to compound the non-sterile preparation

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The master formulation record contains supporting rationale and references
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The master formulation record is kept in a format that is readily accessible to compounding personnel.

Quality and Storage of Ingredients

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The ingredients used for compounding are pure and of good quality
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Purified water or water of equivalent or superior quality is used whenever the formula specifies water as an ingredient.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Tap water is not used for compounding products.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The ingredients used for compounding are obtained from recognized and reliable sources.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The sources of ingredients used for compounding, as well as lot numbers, expiry dates and date of receipt in the pharmacy must be traceable.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Ingredients for compounding that have been recalled or withdrawn from the market for safety reasons are not used.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Current safety data sheets are readily accessible for all ingredients.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Ingredients used for compounding are stored under conditions that will preserve their purity and quality.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	For ingredients without an expiry date assigned by the manufacturer, the container is labelled with the date of receipt and a conservative expiry date, that does not exceed 3 years after receipt, depending on the nature of the ingredient, the container and storage conditions.

Compounding Record

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The compounding record is kept for each individual prescription and for non-sterile preparations made in batches. (can be paper based or electronic form)
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	In cases where the preparation was made by another pharmacy, the origin of the compounded non-sterile preparation dispensed to the patient is recorded in the patient's file.

Phase 3

Verification of final compounded non-sterile preparations

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Verification is performed at each stage of the compounding process.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Final verification takes place before the preparation is dispensed.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The master formulation record and compounding record are reviewed to ensure no errors have occurred in the compounding process and the preparation is suitable for use.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	All information on the final label is verified, including the BUD.

Labelling and packaging

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A policy for labelling and packaging has been established and is followed.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The label and supplementary label provides all the information required for proper use of the compounded preparation by the patient or for safe administration by a third party.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Special precautions related to drug storage (ie refrigerate) are included on the label or supplemental label.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	All active ingredients and the concentration of the active ingredients are identified on the label.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The label includes the BUD, storage and handling information.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Packaging used is appropriate to maintain the integrity of the compounded preparation.

Storage

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A storage procedure has been established and is followed.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Active and inactive ingredients are stored according to manufacturer's recommendations, in a manner that prevents cross-contamination.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Each finished product is stored according to requirements outlined in the master formulation record.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Products that have been stored are inspected before use to detect any signs of deterioration.

Transport and delivery

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Policies for transport and delivery have been established.
-------------------------------	-------------------------------	-------------------------------	---------------------------------	--

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Policies for transport and delivery address special precautions for non-sterile compounded products.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Preparations for delivery are packed and labelled in a manner that ensures the safety of patients and delivery persons.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Transport conditions related to temperature, fragility and safety are indicated on the outside of the packaging.

Product recalls

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Procedures for recall of products include documentation that ensure traceability of all ingredients included in the non-sterile products.
-------------------------------	-------------------------------	-------------------------------	---------------------------------	---

Incident reporting

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	An incident report is completed for any incident or accident involving a compounded non-sterile product.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Complaints, accidents, incidents and reported side effects are evaluated to determine the cause, and necessary steps are taken to prevent a recurrence.

Quality Assurance

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A quality assurance program has been developed and implemented to ensure the clear definition, application and verification of all activities affecting the quality of the final product and the protection of personnel.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Equipment used for compounding is certified at regular intervals and at installation.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Temperature readings are taken at regular intervals to ensure the integrity of products stored in refrigerators, in freezers, or at room temperature.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Compounding personnel are trained, certified and reassessed at regular intervals to ensure maintenance of competency.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Non-compliance with the quality assurance program and corrective actions are documented.

Level B Requirements

Level B refers to requirements to be met when compounding complex preparations, as defined in USP General Chapter <795>, or when compounding small quantities of products that require ventilation. These compounded preparations require more specialized equipment, instruments and training. Level B requirements include a dedicated room that is separate from the rest of the pharmacy, to provide for a larger work space, storage of materials and equipment, uninterrupted workflow and greater protection from cross-contamination.

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level B compounds are compounded in a separate, well-ventilated room.
-------------------------------	-------------------------------	-------------------------------	---------------------------------	---

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level B compounds are compounded in an environment conducive to few or no interruptions.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The facility has appropriate equipment and workspace to compound Level B compounds.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level B compounds are compounded in a ventilated containment device when certain powders, aromatic products or hazardous products are compounded.

Phase 4

Hazardous Preparations

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The risk assessment for hazardous materials is reviewed at least every 12 months.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Facilities for handling hazardous products have been constructed to minimize the risk of exposure to compounding personnel and other pharmacy staff.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The compounding room is ventilated through high-efficiency particulate air (HEPA) filtration, has appropriate air exchange and has negative pressure relative to surrounding rooms
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The compounding room contains an eyewash station and any other emergency or safety equipment required
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The compounding room has been constructed with smooth impermeable surfaces to promote adequate cleaning and decontamination
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	The heating, ventilation and air conditioning system in the compounding room has been constructed to prevent contamination of the areas surrounding the compounding room and to ensure the comfort of personnel wearing PPE.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Windows and other openings in the compounding room do not lead directly outside or to a non-controlled area
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	There is an appropriate area for unpacking hazardous products, and a C-PEC is available for unpacking hazardous products that appear to be damaged
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Hazardous products are stored in a room with appropriate ventilation
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Areas for storing and preparing hazardous products are identified with appropriate signage
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	A C-PEC that provides appropriate personal and environmental protection has been installed and maintained
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	All reusable equipment and devices are adequately deactivated, decontaminated and cleaned
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	PPE approved for the compounding of hazardous non-sterile preparations Are worn during compounding activities: - chemotherapy gloves - disposable, impermeable gown - head, hair, shoe and sleeve covers

					- respiratory protection - eye and face protection
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Compounding area, equipment and accessories are meticulously Cleaned.
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Cleaning is done to eliminate chemical contamination, specifically by deactivating, decontaminating and cleaning the premises and equipment
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Cleaning personnel comply with the pharmacy's hand hygiene and garbing procedure for handling hazardous products
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The work surface of the C-PEC is deactivated, decontaminated and cleaned before starting the compounding of a different preparation
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Policies and procedures have been developed and followed for cases of accidental exposure of personnel to hazardous products
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Personnel receive training to prevent spills, as well as training on appropriate procedures to clean up spills, including use of a spill kit
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Incidents and accidents are documented and followed up to prevent recurrence.
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Procedures are in place for the destruction and/or disposal of pharmaceutical waste in compliance with environmental protection legislation
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	All personnel involved in the management of hazardous product waste receive appropriate training and have access to all necessary PPE and cleaning supplies
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	The controlled room and C-PEC are examined and certified every 6 months according to manufacturer's recommendations, as appropriate (and more often in the case of new equipment installation, repairs or a contamination problem)
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	Manufacturers' factory-issued certificates for all HEPA filters and C-PECs are retained for the service life of the equipment.
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	An environmental verification program has been established to ensure safety Standards.
1	2	3	N/A	<input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/> <input type="checkbox"/>	All completed documentation concerning components of testing of controlled rooms and equipment for hazardous product contamination are filed and retained with other compounding records.

Level C requirements

Level C refers to requirements to be met when compounding hazardous drugs that are classified by NIOSH as Group 1 or hazardous materials that are classified by WHMIS as a health hazard, such as those very irritating to the respiratory tract, skin, or mucous membranes. This level of requirements may also apply to NIOSH Group 2 and 3 drugs involving routine use of large quantities of APIs, according to the risk assessment. Level C requirements include a room under negative pressure and appropriate air exchange, a ventilated containment device and PPE appropriate for handling hazardous products.

--	--

1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level C compounds are compounded in a separate, negative pressure room.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Level C compounds are compounded in an appropriate containment device.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Hazardous drugs classified as Group 1 by NIOSH are considered Level C.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	Hazardous materials classified by WHMIS as representing a health hazard, such as those that are very irritating to the respiratory tract, the skin or the mucous membranes are considered Level C.
1 <input type="checkbox"/>	2 <input type="checkbox"/>	3 <input type="checkbox"/>	N/A <input type="checkbox"/>	NIOSH Group 2 and 3 drugs for which large quantities of APIs are used routinely are considered Level C.
