Prescribing Authority Table for Prescriptions Dispensed by Community Pharmacies for Outpatients (Updated May 2024)

Prescriber	Directory	Scope of Prescribing	Prescribing Conditions	Prescribing of Controlled Substances (narcotics, controlled drugs, and targeted substances)	Designation	DPIN Entry
Post Graduate Medical Resident (NOT specifically authorized by CPSM to prescribe)	Educational Directory	Educational Setting of the Residency Program	Prescription must include: <ul style="list-style-type: none"> Name & signature of Resident Year of training Contact phone/paging number of Resident. Name of supervising Physician (actual co-signature not required) Treatment goal &/or diagnosis &/or clinical indication Cannot exceed a 3-month supply 	Cannot prescribe M3P drugs. A Resident can independently prescribe (co-signature of supervising Physician not required) a drug or vaccine for a patient treated by the Resident in an educational setting, including non-M3P controlled substances if all Prescribing Conditions (in the adjacent column) are met. This includes the prescribing of: <ul style="list-style-type: none"> Controlled drugs (excluding all M3P drugs); Targeted substances (i.e., benzodiazepines); Codeine-containing products not exceeding 60 mg per dose (i.e., Tylenol #3 - up to 2 tabs per dose). 	Post Graduate Year (PGY#)	Supervising Physician License Number
Post Graduate Medical Resident (Authorized by CPSM to Prescribe)	Educational Directory (with training and approval from CPSM, Resident prescribing privileges are indicated with an asterisk)		A verbal or faxed prescription is acceptable.			

Prescribing authority for physicians is determined by licensure not participation in a residency program. Physicians who have completed a primary residency and who maintain full or provisional registration with CPSM while in an additional residency program (e.g., formally called “fellows” in some programs) have the same prescribing authority as other fully licensed physicians. They can elect to pursue prescribing approvals for methadone and/or buprenorphine/naloxone. Such physicians who opt instead to maintain an educational licence with CPSM during their residency would have to follow the same prescribing rules as residents. They also cannot be granted prescribing approvals for methadone and/or buprenorphine/naloxone. A prescriber’s licensure can be verified on CPSM’s website [here](#).

*** Please note this table is meant as a general guidance to practicing Manitoba pharmacists, and all information within was obtained from the respective regulatory bodies according to their legislation. Any specific or further questions regarding the scope of practice of other health care professionals should be directed to the appropriate regulatory authority.***

Notes

** Manitoba pharmacists can fill prescriptions for health professionals listed as “designated practitioners” in the [Pharmaceutical \(General Matters\) Regulation](#), subject to having prescribing authority in their home province. Designated practitioners include the following:

1. A **pharmacist** authorized to practice pharmacy in Manitoba or another Canadian province or territory;
2. A **registered nurse** authorized to practice registered nursing in Manitoba or another Canadian province or territory;
3. An **optometrist** authorized to practice optometry in Manitoba or another Canadian province or territory;
4. A **midwife** authorized to practice midwifery in Manitoba or another Canadian province or territory;

*** Please note this table is meant as a general guidance to practicing Manitoba pharmacists, and all information within was obtained from the respective regulatory bodies according to their legislation. Any specific or further questions regarding the scope of practice of other health care professionals should be directed to the appropriate regulatory authority.***

College of Pharmacists of Manitoba

Prescribing Authority Table for Prescriptions Dispensed by Community Pharmacies for Outpatients (Updated May 2024)

5. A **registered psychiatric nurse** authorized to practice registered psychiatric nursing in Manitoba or another Canadian province or territory;
6. A **podiatrist** authorized to practice podiatry in Manitoba or another Canadian province or territory.

Manitoba pharmacists can also fill prescriptions from **out-of-province physicians, veterinarians, and dentists**.

Pharmacists in Manitoba **cannot dispense prescriptions from in-province or out-of-province naturopaths** (or any other healthcare professional not listed above) even if they have prescriptive authority in their own province. At some point in time naturopaths may be added to this regulation, but currently they are not included in the ministerial regulation.

*** Please note this table is meant as a general guidance to practicing Manitoba pharmacists, and all information within was obtained from the respective regulatory bodies according to their legislation. Any specific or further questions regarding the scope of practice of other health care professionals should be directed to the appropriate regulatory authority.***
