

Changing the hours of operation of a pharmacy

A licensed pharmacy is able to change their hours of operation, provided they maintain the conditions of the Practice Direction: Pharmacy Facilities and the required 25 hours of operation over a minimum of four days per week are met.

1. The pharmacy manager must access the College of Pharmacists of Manitoba's website and change the hours of operation on the Pharmacy profile.
2. Sufficient notice of the changes to the hours of operation must be given to the public.
3. The hours of operation, as posted at the principle entrance must be updated.
4. In the case of a pharmacy with a lock and leave component, the hours of operation must be updated on both copies of the lock and leave permit.
